

peyer graphic is aware of its responsibility towards our environment.

Products as PEYTAN, PEYPRINT, PEYDUR and SURBALIN have been produced in TCF for many years. Already in 1989, we arranged an expertise on the environmental compatibility of CRYLUXE. In the meantime, CRYLUXE has also been FSC®-certified.

We have acted responsibly in the past and do so nowadays as well as in the future.

For example, since February 2013 we have included the cotton fabric BARONESSE in our range, which is FSC®-certified. In the meantime, many other fabrics have been FSC®-certified.

Today, we and our partners develop, produce and supply our products according to the following specifications:

FSC® (Forest Stewardship Council®)

The FSC® aims to conserve forests. It intends to achieve this goal not only by protecting them, but above all by supporting a responsible forest economy. Strict criteria, to which the management of forests is to be aligned, serve to avoid uncontrolled deforestation, violation of human rights and pollution of the environment. The rules of the FSC® require that the entire processing and trading chain from the forest to the wholesaler has to be completely certified. As part of the certification process, incoming and outgoing goods as well as production processes are audited once a year by independent third parties.

Please ask for our FSC®-certified available products!

REACH

The REACH Regulation (No. 1907/2006) is an EU chemicals regulation that entered into force on 1 June 2007. REACH stands for Registration, Evaluation, Authorisation and Restriction of Chemicals.

peyer graphic considers the REACH regulation as an opportunity for industry to contribute to the protection of human health and the environment. We are therefore committed to paying close attention to the tasks assigned to us in this matter.

For the REACH regulation our products are manufactured items and therefore they do not need to be registered.

We work closely with our partners to ensure that responsibility is taken within the production chain in relation to the REACH regulation and that, if necessary, substances are pre-registered accordingly. Our partners confirm that our products do not contain any SVHC substances above 0.1 mass percent at the current state of knowledge.

Other standards that our products or our production partners meet, are among other things:

- _the recommendation of the BfR XXXVI
- _the DIN EN 71, part 3 (this describes the safety of toys)
- _the ISO Standards 14001 (Protection of the environment and avoiding environmental load)
- _the ISO 50001 (Energy management)
- _the ISO 9001 (Requirements to a quality management system)
- _cradle to cradle conformity
- _vegetarian or vegan

Please also note the list below of all certificates for each product. You can find them on our website in the downloads section or here: <https://www.peyer-cover.com/de/zertifikate>
